**Koudekerk aan den Rijn, Netherlands**

## Consolis VBI starts the construction of new factory in Koudekerk aan den Rijn

Consolis VBI, a leader in precast concrete solutions, has commenced construction of its new factory in Koudekerk aan den Rijn, in the Netherlands. This development marks a significant milestone in enhancing production capabilities and reinforcing sustainable practices within the Dutch construction sector.

Eduard van der Meer, Chief Executive Officer of Consolis Group, commented: "This new facility represents a natural progression in our growth strategy, enabling us to meet our customers' demands more effectively. Its strategic location and state-of-the-art equipment will significantly impact the Dutch construction market."

### **Strategic expansion to meet housing demand**

The Netherlands anticipates substantial housing development in the coming years, particularly in the Randstad region, which is expected to account for over half of new residential projects. The new factory's central location allows Consolis VBI to efficiently serve this demand aligning with the company's sustainability goals by reducing transportation distances and associated CO<sub>2</sub> emissions.

### **Improved sustainable production**

The facility will begin production in early 2026 and will feature advanced production technologies designed to maximize output while minimizing environmental impact. Increased mechanization and automation will enhance efficiency and precision in manufacturing. This development not only improves product quality but also creates a modern and sustainable working environment.
